

FLAVIO

FORTE

Font-End Web Developer . Software Engineer

I have been working in various countries, including Italy, Australia, Germany, and Spain, for over 10 years. These experiences have not only improved my English language skills, but also provided me with valuable work experience in the hospitality and sales industries. While I have been active in these fields, I am now seeking a transition to the IT sector and look forward to exploring new opportunities in this field. I have been actively studying software programming since November 2021.

I have passion for software programming and I am excited to apply my skills and knowledge to real world projects, I really want to keep learning and growing in the software development field and I search new challenges and opportunities

EDUCATION

Jan - 2023
(in progress)

Bootcamp Backend Lemoncode

Currently enrolled in a Backend Bootcamp, actively developing expertise in both document-based databases, such as MongoDB, including modeling, MQL, aggregated queries, and index optimization, as well as relational databases like SQL Server, encompassing modeling and advanced querying techniques. Proficient in Node.js, demonstrating a strong grasp of JavaScript and TypeScript, API development (REST), security practices, cloud deployment, and GraphQL. Committed to acquiring comprehensive backend development skills to build robust and scalable applications.

Jan - Apr 2023

Front End Master Lemoncode

- Master focused on teaching the last and most useful technologies in front-end web development such as React, Angular, Vuejs, Svelte, d3js, HTML / CSS, Material Design, CSS in JS, Jest, GraphQL Webpack, Parcel, Vite, ES6/ES7, Typescript, Docker, Github Actions, Azure, AWS.
- Implemented labs can be found on my Github account.

EDUCATION

Feb - Jul 2022

Front End Bootcamp

PIXELPRO

- Programming initiation bootcamp, which covered programming fundamentals (ES6 / TypeScript), as well as the use of libraries and frameworks such as React, Angular, Vue, JQuery, HTML and CSS standards, and an introduction to nodejs and MySql was also carried out.
- Implemented labs can be found on my Github account.

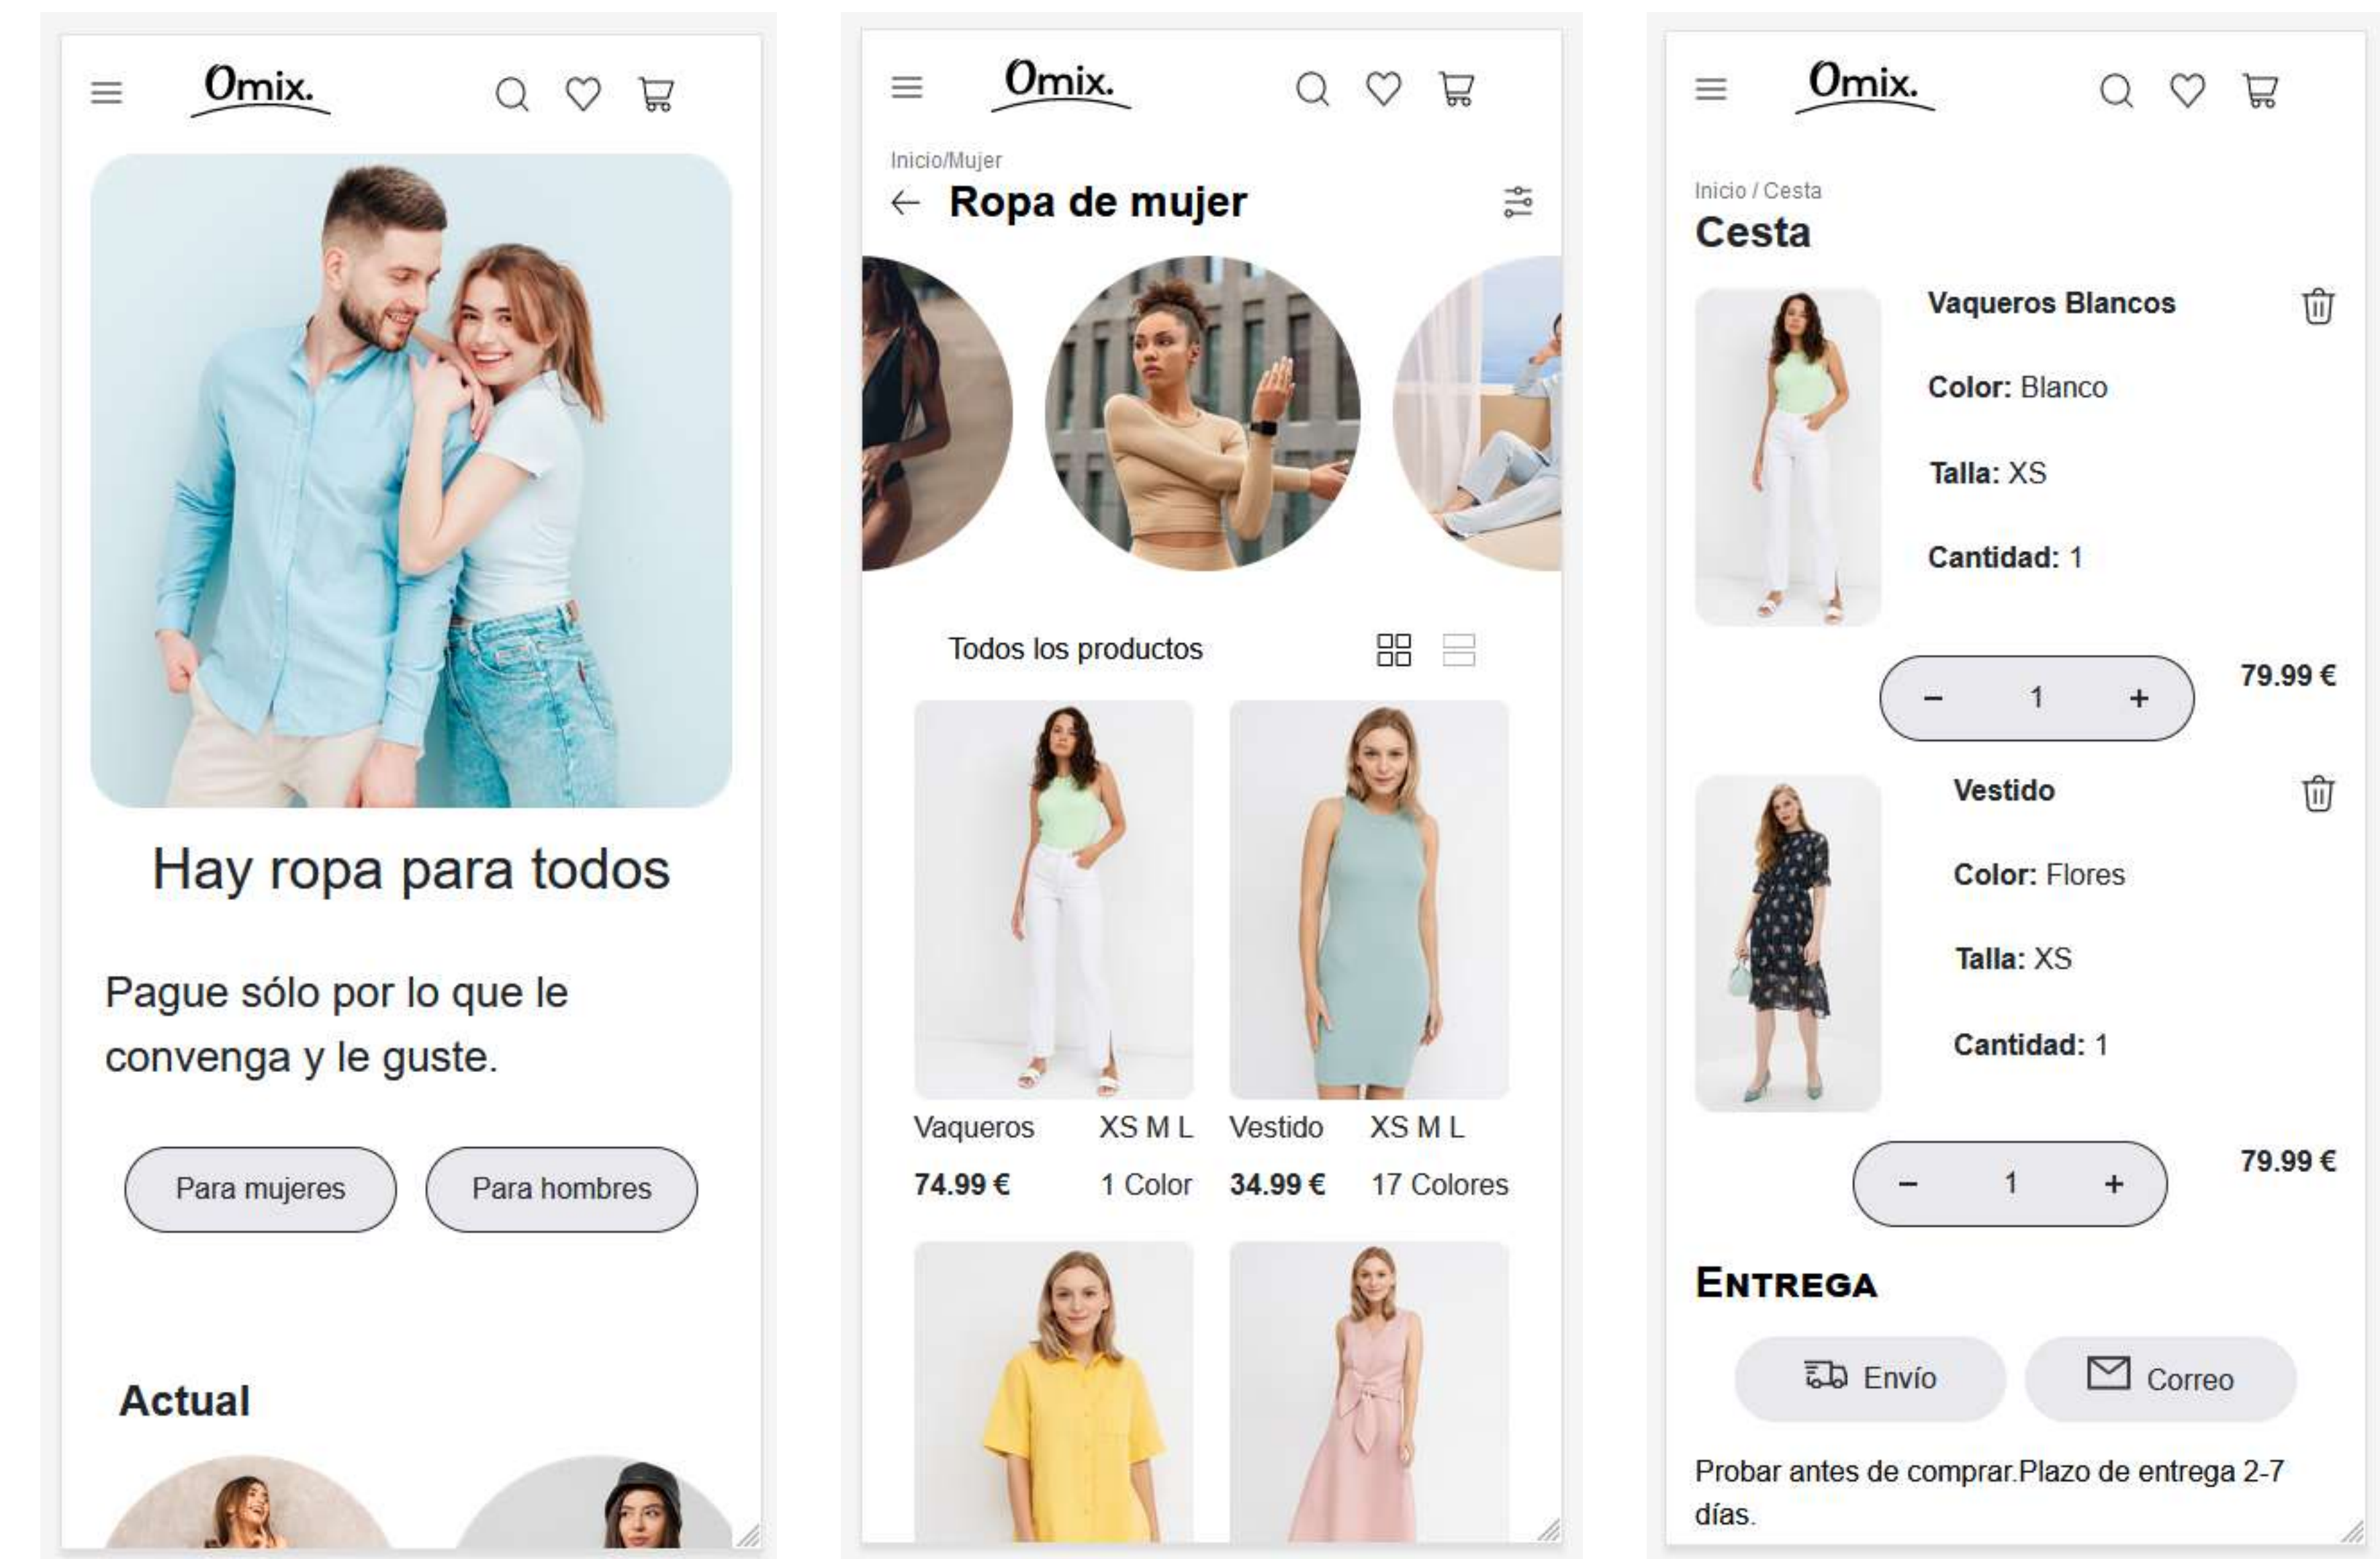

OPEN SOURCE PROJECTS

ECommerce SAMPLE APP

Simple Ecommerce simulation, SPA React application: list of items, details, and shopping cart implementation.

<https://e-commerce-lemoncode.vercel.app/>

<https://github.com/salino3/e-commerce-lemoncode>

RESTAURANT RESERVATION SAMPLE APP

Example restaurant reservation CRUD like developed using React, TypeScript and Nodejs.

<https://github.com/salino3/ts-restserver-v2-25-12-2022>

BOOKSTORE SAMPLE APP

Example bookstore CRUD like developed using React TypeScript and Nodejs.
